OGUCHE MARK

OBJECTIVE

To apply my skills in modern front-end technologies and user-centered design to build responsive, accessible, and high-performance web applications. Committed to delivering clean, maintainable code and intuitive user experiences while collaborating with cross-functional teams to create impactful digital solutions.

CORE COMPETENCIES

- Front-End Development – React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, JavaScript
- UI/UX Collaboration – Translating Figma designs into functional, responsive components
- Web Performance Optimization – Lazy loading, bundle size reduction, rendering improvements
- CMS & API Integration – WordPress, Sanity, third-party APIs
- SEO & Accessibility – WCAG compliance, cross-browser compatibility, performance optimization
- Technical Support – Form submissions, Google Sheets integration, DNS/domain management
- Communication & Teamwork – Strong research, active listening, and stakeholder collaboration

WORK EXPERIENCES

Company Name: NINTV
Job Role: Web Developer | April 2025 – August 2025
Responsibilities:

- Supported the organization's digital presence by designing, structuring, and maintaining responsive web pages for events, activities, and galleries.
- Ensured consistent branding, clean layouts, and animations across union pages.
- Assisted with form submissions, Google Sheets connections, and DNS/domain management.
- Collaborated with team members to strengthen online visibility and engagement with the Igbo community in Tees Valley.

Company Name: Saw-T Concept
Job Role: Front-End Developer | Aug 2024 – Dec 2024
Responsibilities:

- Designed and implemented modular UI components using React and TypeScript.
- Integrated third-party libraries and APIs for interactive dashboards and data visualization.
- Built consistent responsive layouts using Tailwind CSS.
- Worked with backend teams to define data contracts and ensure seamless integration.

Company Name: Boro Digital Dynamics
Job Role: Wordpress Developer | Sept 2023 – Dec 2023
Responsibilities:

- Translated Figma wireframes into functional web components for mobile and desktop.
- Optimized web performance with lazy loading and bundle size reduction.
- Conducted usability testing and implemented improvements to increase user satisfaction.
- Maintained reusable component libraries and documentation.
- Resolved front-end bugs, reducing QA bottlenecks in production.

Company Name: Freelancer
Job Role: Front-End Developer | December 2022 – Present
Responsibilities:

- Delivered custom websites and landing pages across industries with React, Next.js, Tailwind CSS, and TypeScript.
- Worked directly with clients to gather requirements and iterate designs quickly.
- Integrated CMS platforms (WordPress, Sanity) and API-driven features.
- Improved SEO, accessibility, and cross-browser compatibility for better user reach.

ACHIEVEMENTS

- Successfully improved engagement and visibility for NINTV community websites.
- Delivered 100% of freelance projects on time with positive client feedback.
- Consistently optimized web apps for speed, accessibility, and SEO.
- Maintained scalable component libraries improving collaboration across teams.

TOOL AND TECHNICAL PROFICIENCY

- Front-End Tools & Frameworks: React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, JavaScript.
- Design & Collaboration: Figma, Canva
- CMS & Integrations: WordPress, Sanity
- Project Management & Communication: GitHub and BitBucket
- Productivity & SEO: Microsoft Office Suite, Google Workspace, SEO Auditing Tools
